

Anti-obesogenic functional food and method of preparation thereof

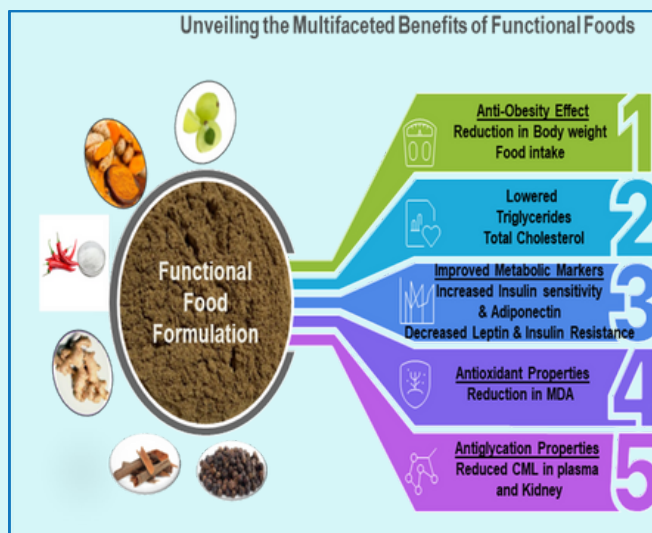

Domain: Functional Food

About Technology: This technology is a poly-herbal formulation developed from five natural herbs. Its anti-inflammatory, anti-glycation, aldose-reductase inhibitory, antioxidant, and immunomodulatory properties offer a safe, anti-obesogenic functional food with no known side effects. The formulation provides a sustainable approach to managing obesity and improving obesity-related health outcomes.

Intended Use: A molecular target-based functional food composition for the management of obesity and associated complications

Advantages:

- Multi-targeted action for obesity management
- Exhibits anti-inflammatory, anti-glycation, Aldose reductase inhibiting, antioxidant, and immunomodulatory effects
- Supports long-term, sustainable control of obesity and related complications

IP Status: Filed (Indian patent Application No. - 202411045411)

Development Status: Preclinical studies complete

Institute(s): ICMR-National Institute of Nutrition (NIN)
